

Vassia Tegoulia joined the PTO in 2018. She has two kids both students at the Greek School. Vassia believes that learning Greek will help them understand and maintain their cultural heritage, make their trips to Greece more fun and help them with academics in the US. Vassia was born and raised in Northern Greece. She got her undergraduate degree from the Aristotle University in Thessaloniki and her PhD in Chemical Engineering from the University of Delaware. She then moved to California to work in biotechnology for Genentech/Roche where she has been for the past 18 years in roles of increasing responsibility in Technical Development and Regulatory. In her free time, she loves to read, travel and explore the world with her family.
